Contents of Volume 68

No. 1. JANUARY 1990

BRIEF REVIEW

Atrophy of the soleus muscle by hindlimb unweighting
D. B. Thomason and F. W. Booth 1

Bone growth and calcium balance during simulated weightlessness in the rat
R. D. Roer and R. M. Dillaman 13

Histamine H_3-receptors inhibit neurogenic microvascular leakage in airways
M. Ichinose, M. G. Belvisi, and P. J. Barnes 21

Fatigue of single motor units in human masseter
M. A. Nordstrom and T. S. Miles 26

Respiratory changes in diaphragmatic intramuscular pressure
M. Decramer, T.-X. Jiang, and M. B. Reid 35

Effect of paraxanthine on FFA mobilization after intravenous caffeine administration in humans
R. K. Hetzler, R. G. Knowlton, S. M. Somani, D. D. Brown, and R. M. Perkins III 44

Skeletal muscle adaptation in rats flown on Cosmos 1667
D. Desplanches, M. H. Mayet, E. I. Ilyina-Kakueva, B. Sempore, and R. Flandrois 48

Cervical sympathetic and phrenic nerve responses to progressive brain hypoxia
M. J. Wasicko, J. E. Melton, J. A. Neubauer, N. Krawciw, and N. H. Edelman 53

Thermoregulatory responses to acute body heating in rats acclimated to continuous heat exposure
O. Shido and T. Nagasaka 59

Heat loss responses in rats acclimated to heat loaded intermittently
O. Shido and T. Nagasaka 66

Heat-induced finger vasoconstriction controlled by skin sympathetic nerve activity
T. Nagasaka, K. Hirata, T. Mano, S. Iwase, and Y. Rossetti 71

Diffusivity dependence of multiple-breath washouts of lung periphery
G. G. Berdine, D. Dale, J. E. Johnson, and J. L. Lehr 76

Shivering and cardiorespiratory responses during normocapnic hypoxia in the pigeon
G. M. Barnas and W. Rautenberg 84

Mechanisms of gas exchange with different gases during constant-flow ventilation
F. J. Chen, A. S. Menon, S. V. Lichtenstein, N. Zamel, and A. S. Slutsky 88

Gas exchange abnormalities after pneumonectomy in conditioned foxhounds
C. C. W. Hsia, J. I. Carlin, P. D. Wagner, S. S. Cassidy, and R. L. Johnson, Jr. 94

Mechanism for increase in tracheobronchial blood flow induced by hyperventilation of dry air in dogs
E. M. Baile, D. J. Godden, and P. D. Paré 105

Muscle mitochondrial ultrastructure in exercise-trained iron-deficient rats
J. A. Johnson, W. T. Willis, P. R. Dallman, and G. A. Brooks 113

Enhancement of arm exercise endurance capacity with dihydroxyacetone and pyruvate
R. T. Stanko, R. J. Robertson, R. J. Spina, J. J. Reilly, Jr., K. D. Greenawalt, and F. L. Goss 119

Bronchial circulation in pulmonary artery occlusion and reperfusion
T. F. Kowalski, S. Guidotti, M. Deffebach, P. Kubilis, and M. Bishop 125

Bone mechanical properties after exercise training in young and old rats
D. M. Raab, E. L. Smith, T. D. Crenshaw, and D. P. Thomas 130

Control of pH of airway surface liquid of the ferret trachea in vitro
H. Kyle, J. P. T. Ward, and J. G. Widdicombe 135

Effects of nasal CPAP on supraglottic and total pulmonary resistance in preterm infants
M. J. Miller, J. M. DiFiore, K. P. Strohl, and R. J. Martin 141

Assessment of cardiovascular reflexes: influence of posture and period of preceding rest
A. D. J. Ten Harkel, J. J. Van Lieshout, E. J. Van Lieshout, and W. Wieling 147

Responses to negative pressure surrounding the neck in anesthetized animals
A. D. Wolin, K. P. Strohl, B. N. Acree, and J. M. Fouke 154

Activation of branched-chain α-keto acid dehydrogenase complex by exercise: effect of high-fat diet intake
Y. Shimomura, T. Suzuki, S. Saitoh, Y. Tasaki, R. A. Harris, and M. Suzuki 161

Startle-evoked changes in diaphragmatic activity during wakefulness and sleep
L. R. Kline, J. C. Hendricks, D. A. Silage, A. R. Morrison, R. O. Davies, and A. I. Pack 166

Relative contribution of neurotransmission failure to diaphragm fatigue
J. E. Kuei, R. Shadmehr, and G. C. Sieck 174

Ventilatory effects of high and pulsatile blood flow in the pulmonary circulation
G. G. Giesbrecht and M. Younes 181

Changes in airway length after unilateral pneumonectomy in weanling ferrets
K. K. Kirchner and J. T. McBride 187

Skeletal muscle plasma membrane glucose transport and glucose transporters after exercise
L. J. Goodyear, M. F. Hirshman, P. A. King, E. D. Horton, C. M. Thompson, and E. S. Horton 193

Modulation of lymphatic pumping by lymph-borne factors after endotoxin administration in sheep
R. M. Elias and M. G. Johnston 199

Tracheal smooth muscle mechanics in vivo
M. Okazawa, P. Paré, and J. Road 209

Protamine increases the permeability of cultured epithelial monolayers
M. W. Peterson and D. Gruenhaupt 220

Effects of allopurinol on smoke inhalation in the ovine model
S. Y. Ahn, K. Sugi, P. Talke, J. L. Theissen, H. A. Linares, L. D. Traber, D. N. Herndon, and D. L. Traber 228

Effects of phorbol myristate acetate-stimulated human leukocytes on rat lung
M. L. Perry, S. G. Kayes, J. W. Barnard, and A. E. Taylor 235

Oxygen consumption and distribution of blood flow in rats climbing a laddermill
K. I. Norton, M. T. Jones, and R. B. Armstrong 241

Time-dependent changes in cardiovascular regulation caused by chronic tobacco smoke exposure
C. H. Bennett and D. R. Richardson 248

Does leukotriene C_4 mediate hypoxic vasoconstriction in isolated ferret lungs?
C. M. Tseng, M. McGeady, T. Privett, A. Dunn, and J. T. Sylvester 253

Interaction between concurrent strength and endurance training
D. G. Sale, J. D. MacDougall, I. Jacobs, and S. Garner 260

Rate of disappearance of glycerol from plasma of fetal and newborn sheep
G. G. Power, K. T. Ball, H. Asakura, and P. D. Gluckman 271

Solute concentrations of the pulmonary epithelial lining fluid of anesthetized rats
R. M. Effros, N.-H. Feng, G. Mason, K. Sietsema, P. Silverman, and J. Hukkanen 275

Effects of timing of inspiratory occlusion on cerebral evoked potentials in humans
W. R. Revelette and P. W. Davenport 282

Training-induced skeletal muscle adaptations are independent of systemic adaptations
J. R. Minotti, E. C. Johnson, T. L. Hudson, G. Zuroske, E. Fukushima, G. Murata, L. E. Wise, T. W. Chick, and M. V. Icenogle 289

Ventilatory effects of substance P, vasoactive intestinal peptide, and nitroprusside in humans
D. L. Maxwell, R. W. Fuller, C. M. S. Dixon, F. M. C. Cuss, and P. J. Barnes 295

Gender differences in substrate for endurance exercise
L. J. Tarnopolsky, J. D. MacDougall, S. A. Atkinson, M. A. Tarnopolsky, and J. R. Sutton 302

Plasma [H^+] regulation and whole blood [CO_2] in exercising ponies
H. V. Forster, C. L. Murphy, A. G. Brice, L. G. Pan, and T. F. Lowry 309

In vivo regulation of plasma [H^+] in ponies during acute changes in P_{CO_2}
H. V. Forster, C. L. Murphy, A. G. Brice, L. G. Pan, and T. F. Lowry 316

Effect of caffeine on ventilatory responses to hypercapnia, hypoxia, and exercise in humans
A. D. D'Urzo, R. Jhirad, H. Jenne, M. A. Avendano, I. Rubinstein, M. D'Costa, and R. S. Goldstein 322

Strength training and determinants of $\dot{V}O_{2\,max}$ in older men
W. R. Frontera, C. N. Meredith, K. P. O'Reilly, and W. J. Evans 329

Contractile properties of rat soleus muscle after 15 days of hindlimb suspension
L. Stevens, Y. Mounier, X. Holy, and M. Falempin 334

Clearance of charged and uncharged dextrans from normal and injured lungs
M. P. Barrowcliffe, G. D. Zanelli, D. Ellison, and J. G. Jones 341

Effect of electrical stimulation on intracellular triacylglycerol in isolated skeletal muscle
J. F. Hopp and W. K. Palmer 348

Effect of hindlimb suspension on cardiovascular responses to sympathomimetics and lower body negative pressure
J. M. Overton and C. M. Tipton 355

Effects of increasing doses of β-agonists on airway and parenchymal hysteresis
Y. T. Wang, L. M. Thompson, E. P. Ingenito, and R. H. Ingram, Jr. 363

Cardiac receptors evoke ventilatory response with increased venous P_{CO_2} at constant arterial P_{CO_2}
J. A. Estavillo 369

Neutrophils are not necessary for induction of ischemia-reperfusion lung injury
G. M. Deeb, C. M. Grum, M. J. Lynch, T. P. Guynn, K. P. Gallagher, A. G. Ljungman, S. F. Bolling, and M. L. Morganroth 374

Improved frequency response of pneumotachometers by digital compensation
P. E. Renzi, C. A. Giurdanella, and A. C. Jackson 382

SPECIAL COMMUNICATIONS

Ischemia-reperfusion injury in isolated rat hindquarters
W. L. Sexton, R. J. Korthuis, and M. H. Laughlin 387

A model-based evaluation of the single-breath CO_2 ventilatory response test
M. C. K. Khoo 393

Spontaneous running increases $\dot{V}O_{2\,max}$ and running performance in rats
M. I. Lambert and T. D. Noakes 400

Effect of sampling on variability and plateau in oxygen uptake
J. Myers, D. Walsh, M. Sullivan, and V. Froelicher 404

RAPID COMMUNICATIONS

Stimulation of tracheal ciliary beat frequency by localized tissue incision
L. B. Wong and D. B. Yeates 411

Electromechanical effects of endothelin on ferret bronchial and tracheal smooth muscle
H.-K. Lee, G. D. Leikauf, and N. Sperelakis 417

BOOKSHELF 421

ABSTRACTS FROM CURRENT LITERATURE 423

No. 2. FEBRUARY 1990

BRIEF REVIEW

Modulation of respiration during brain hypoxia
J. A. Neubauer, J. E. Melton, and N. H. Edelman 441

Plasma free and sulfoconjugated catecholamines during sustained exercise
M. S. Sothmann, J. Blaney, T. Woulfe, S. Donahue-Fuhrman, K. Lefever, A. B. Gustafson, and V. S. Murthy 452

Diameters, generations, and orders of branches in the bronchial tree
K. Horsfield 457

Pulmonary vascular pressure-flow characteristics in canine pulmonary embolism
I. Hasinoff, J. Ducas, U. Schick, and R. M. Prewitt 462

Contraction of smooth muscle of pig airway tissues from before birth to maturity
M. P. Sparrow and H. W. Mitchell 468

Effect of superior vena caval hypertension on alloxan-induced lung injury in dogs
F. Ando, M. Arakawa, K. Kambara, H. Miyazaki, T. Segawa, and S. Hirakawa 478

Effect of lower rib cage expansion and diaphragm shortening on the zone of apposition
W. M. Petroll, H. Knight, and D. F. Rochester 484

Fetal breathing, sleep state, and cardiovascular responses to adenosine in sheep
B. J. Koos and K. Matsuda 489

Limb skeletal muscle adaptation in athletes after training at altitude
M. Mizuno, C. Juel, T. Bro-Rasmussen, E. Mygind, B. Schibye, B. Rasmussen, and B. Saltin 496

Hypocapnia does not alter collateral ventilation in sheep
B. B. Hudak, P. B. Terry, H. A. Menkes, M. D. Jones, Jr., and R. J. Traystman 503

Spectral analysis of muscular sound during isometric contraction of biceps brachii
C. Orizio, R. Perini, B. Diemont, M. M. Figini, and A. Veicsteinas 508

Differences in insulin-induced glucose uptake and enzyme activity in running rats
K. J. Rodnick, C. E. Mondon, W. L. Haskell, S. Azhar, and G. M. Reaven 513

Effect of body weight gain on insulin sensitivity after retirement from exercise training
C. B. Dolkas, K. J. Rodnick, and C. E. Mondon 520

Influence of the renin-angiotensin system on human forearm blood flow
C. Stadeager, B. Hesse, O. Henriksen, F. Bonde-Petersen, J. Mehlsen, and S. Rasmussen 527

Running during recovery from hindlimb suspension induces transient muscle injury
C. E. Kasper, T. P. White, and L. C. Maxwell 533

Body composition and skin temperature variation
J. Frim, S. D. Livingstone, L. D. Reed, R. W. Nolan, and R. E. Limmer 540

Inspiratory and expiratory muscle perfusion in maximally exercised ponies
M. Manohar 544

Endotoxin protection of rats from pulmonary oxygen toxicity: possible cytokine involvement
J. T. Berg, R. C. Allison, V. R. Prasad, and A. E. Taylor 549

Age-related effects of compression rate and duration in cardiopulmonary resuscitation
J. M. Dean, R. C. Koehler, C. L. Schleien, I. Berkowitz, J. R. Michael, D. Atchison, M. C. Rogers, and R. J. Traystman 554

Cardiovascular responses to exercise in the rat: role of corticotropin-releasing factor
K. C. Kregel, J. M. Overton, D. R. Seals, C. M. Tipton, and L. A. Fisher 561

Oxygen radicals in capsaicin-induced bronchoconstriction
Y.-L. Lai 568

Effects of ischemic and hypoxic hypoxia on $\dot{V}O_2$ and lactic acid output during tetanic contractions
W. N. Stainsby, W. F. Brechue, D. M. O'Drobinak, and J. K. Barclay 574

Enhancement of maximal thermogenesis by reducing endogenous adenosine activity in the rat
L. C. H. Wang and T. F. Lee 580

CONTENTS OF VOLUME 68

Plasma catecholamine responses to exercise after training with β-adrenergic blockade
E. E. Wolfel, W. R. Hiatt, H. L. Brammell, V. Travis, and L. D. Horwitz 586

Reactive uptake governs the pulmonary air space removal of inhaled nitrogen dioxide
E. M. Postlethwait and A. Bidani 594

In vivo binding of carbon monoxide to cytochrome *c* oxidase in rat brain
S. D. Brown and C. A. Piantadosi 604

EMG study of respiratory muscles in humans immersed at different water temperatures
M.-L. Choukroun, C. Kays, and P. Varene 611

Effects of acetazolamide on metabolic and respiratory responses to exercise at maximal O_2 uptake
R. J. Rose, D. R. Hodgson, T. B. Kelso, L. J. McCutcheon, W. M. Bayly, and P. D. Gollnick 617

Influence of single hindlimb support during simulated weightlessness in the rat
C. S. Stump, J. M. Overton, and C. M. Tipton 627

Effect of age on changes in flow rates and airway conductance after a deep breath
R. B. Berry, U. P. Pai, and R. D. Fairshter 635

^{31}P-NMR spectroscopy and the metabolic properties of different muscle fibers
E. Achten, M. Van Cauteren, R. Willem, R. Luypaert, W. J. Malaisse, G. Van Bosch, G. Delanghe, K. De Meirleir, and M. Osteaux 644

Role of concentric force in limiting improvement in muscular strength
T. Hortobágyi and F. I. Katch 650

Changes in insulation of body tissue and wet suits during underwater exercise at various atmospheric pressures
J. Iwamoto, S. Sagawa, F. Tajima, K. Miki, H. Tanaka, and K. Shiraki 659

Respiratory impedance to ambient pressure changes at low frequencies
R. Peslin, C. Duvivier, B. Suki, R. Farre, E. Oostveen, and C. Gallina 665

Upper airway muscle and diaphragm responses to hypoxia in the piglet
R. J. Martin, E. van Lunteren, M. A. Haxhiu, and W. A. Carlo 672

Cardiovascular responses to hypoxia and hypercapnia in barodenervated rats
B. R. Walker and B. L. Brizzee 678

Incomplete normalization of dog gracilis muscle grafts with neurovascular repair despite long-term recovery
T. P. Martin, L. A. Gundersen, A. C. Vailas, V. R. Edgerton, and S. K. Das 687

Local effects of substance P on respiratory regulation in the rat medulla oblongata
Z. Chen, J. Hedner, and T. Hedner 693

Use of norepinephrine uptake to measure lung capillary recruitment with exercise
J. Dupuis, C. A. Goresky, C. Juneau, A. Calderone, J. L. Rouleau, C. P. Rose, and S. Goresky 700

Reflex changes in tracheal smooth muscle tone during high-frequency oscillation
G. C. W. Man, K. K. Teo, C. T. Kappagoda, and S. F. P. Man 714

Metabolic effects of exposure to hypoxia plus cold at rest and during exercise in humans
K. A. Robinson and E. M. Haymes 720

Transport of albumin by the rabbit trachea in vitro
A. M. Price, S. E. Webber, and J. G. Widdicombe 726

Mechanism of ethanol-induced vasodilation
S. C. Malpas, B. J. Robinson, and T. J. B. Maling 731

Comparison of the hemodynamic effects of nitric oxide and endothelium-dependent vasodilators in intact lungs
S. L. Archer, K. Rist, D. P. Nelson, E. G. DeMaster, N. Cowan, and E. K. Weir 735

Energy expenditure during bicycling
S. D. McCole, K. Claney, J.-C. Conte, R. Anderson, and J. M. Hagberg 748

Sendai virus infection potentiates neurogenic inflammation in the rat trachea
G. Piedimonte, J. A. Nadel, E. Umeno, and D. M. McDonald 754

Analysis of pulmonary arterial pressure profile after occlusion of pulsatile blood flow
J.-M. I. Maarek, T. S. Hakim, and H. K. Chang 761

Origin and colocalization of CGRP- and SP-reactive nerves in cat airway epithelium
R. D. Dey, J. B. Altemus, I. Zervos, and J. Hoffpauir 770

Repeated antigen inhalation results in a prolonged airway eosinophilia and airway hyperresponsiveness in primates
R. H. Gundel, M. E. Gerritsen, G. J. Gleich, and C. D. Wegner 779

SPECIAL COMMUNICATIONS

Alveolar dead space does not affect indirect Fick cardiac output determinations
J. M. Badgwell and J. E. Heavner 787

Tracheal dead space influences regional ventilation measurement in dogs
L. Delaunois, R. Boileau, and R. R. Martin 792

Investigation of $\dot{V}O_2$ kinetics in humans with pseudorandom binary sequence work rate change
R. L. Hughson, D. A. Winter, A. E. Patla, G. D. Swanson, and L. A. Cuervo 796

Adaptation of the inert gas FRC technique for use in heavy exercise
B. D. Johnson, K. C. Seow, D. F. Pegelow, and J. A. Dempsey 802

BOOKSHELF 810

ABSTRACTS FROM CURRENT LITERATURE 812

ANNOUNCEMENTS 831

No. 3. MARCH 1990

BRIEF REVIEW

Defining hypoxia: a systems view of $\dot{V}O_2$, glycolysis, energetics, and intracellular PO_2
R. J. Connett, C. R. Honig, T. E. J. Gayeski, and G. A. Brooks 833

Mechanical effects of PEEP in patients with adult respiratory distress syndrome
J. Dall'ava-Santucci, A. Armaganidis, F. Brunet, J.-F. Dhainaut, S. Nouira, D. Morisseau, and A. Lockhart 843

Modeling of low-frequency pulmonary impedance in dogs
Z. Hantos, B. Daróczy, T. Csendes, B. Suki, and S. Nagy 849

Sensitization of group III muscle afferents to static contraction by arachidonic acid
D. M. Rotto, H. D. Schultz, J. C. Longhurst, and M. P. Kaufman 861

Respiratory changes in parasternal intercostal intramuscular pressure
P. Leenaerts and M. Decramer 868

Xenon kinetics in muscle are not explained by a model of parallel perfusion-limited compartments
J. A. Novotny, D. L. Mayers, Y.-F. J. Parsons, S. S. Survanshi, P. K. Weathersby, and L. D. Homer 876

Effect of sustained hypoxia on ventilatory response to CO_2 in normal adults
D. Georgopoulos, S. Walker, and N. R. Anthonisen 891

Sympathoadrenergic regulation and the adrenoceptor system
J. Jost, M. Weiss, and H. Weicker 897

Lactate removal ability and graded exercise in humans
S. Oyono-Enguelle, J. Marbach, A. Heitz, C. Ott, M. Gartner, A. Pape, J. C. Vollmer, and H. Freund 905

Pulmonary vasoconstriction in a canine model of neurogenic pulmonary edema
M. B. Maron 912

Inhaled PAF fails to induce airway hyperresponsiveness to methacholine in normal human subjects
C. K. W. Lai, J. R. Jenkins, R. Polosa, and S. T. Holgate 919

Age effects on rat hindlimb muscle atrophy during suspension unloading
J. M. Steffen, R. D. Fell, T. E. Geoghegan, L. C. Ringel, and X. J. Musacchia 927

Group I afferent fibers: effects on cardiorespiratory system
G. P. Orani and M. Decandia 932

Effect of hemoglobin solution on compensation to anemia in the erythrocyte-free primate
A. L. Rosen, S. A. Gould, L. R. Sehgal, H. L. Sehgal, H. D. Levine, R. D. DeWoskin, and G. S. Moss 938

Effects of training on glucose metabolism of gluconeogenesis-inhibited short-term-fasted rats
L. P. Turcotte and G. A. Brooks 944

Acute effects of cigarette smoke on breathing in rats: vagal and nonvagal mechanisms
L.-Y. Lee, R. F. Morton, and Y. R. Kou 955

Adrenergic responses to cognitive activity in a cold environment
J. R. Thomas, S. T. Ahlers, J. F. House, J. Schrot, K. F. Van Orden, M. M. Winsborough, R. L. Hesslink, Jr., and S. B. Lewis 962

Effect of exercise on redistribution and clearance of inhaled particles from hamster lungs
T. D. Sweeney, A. F. Tryka, and J. D. Brain 967

Influence of thyroid hormones and catecholamines on myosin of swim-exercised rats
H. Rupp and R. Wahl 973

Modulation of muscle and pulmonary O_2 uptakes by circulatory dynamics during exercise
T. J. Barstow, N. Lamarra, and B. J. Whipp 979

Endurance training decreases plasma glucose turnover and oxidation during moderate-intensity exercise in men
A. R. Coggan, W. M. Kohrt, R. J. Spina, D. M. Bier, and J. O. Holloszy 990

Carbon monoxide-mediated brain lipid peroxidation in the rat
S. R. Thom 997

Sustained increases in sympathetic outflow during prolonged lower body negative pressure in humans
M. J. Joyner, J. T. Shepherd, and D. R. Seals 1004

Transversus abdominis muscle function in humans
A. De Troyer, M. Estenne, V. Ninane, D. Van Gansbeke, and M. Gorini 1010

Muscarinic receptor reserve of airway smooth muscle and the response to isoproterenol
J. M. Madison 1017

Respiratory muscle electromyogram responses to acute hypoxia in awake ponies

Respiratory muscle responses to changes in chemoreceptor drive in infants
W. A. Carlo and J. M. DiFiore 1041

Prolonged apnea and impaired survival in piglets after sinus and aortic nerve section
D. F. Donnelly and G. G. Haddad 1048

Enhanced efficiency of lactate removal after endurance training
C. M. Donovan and M. J. Pagliassotti 1053

PAF potentiates protamine-induced lung edema: role of pulmonary venoconstriction
C.-R. Chen, N. F. Voelkel, and S.-W. Chang 1059

Lymphocyte subset responses to repeated submaximal exercise in men
L. Hoffman-Goetz, J. R. Simpson, N. Cipp, Y. Arumugam, and M. E. Houston 1069

Changes in upper airway resistance with lung inflation and positive airway pressure
F. Séries, Y. Cormier, J. Couture, and M. Desmeules 1075

Exercise training and incidence of cerebrovascular lesions in stroke-prone spontaneously hypertensive rats
C. M. Tipton, S. McMahon, J. R. Leininger, E. L. Pauli, and C. Lauber 1080

Quantitation of cerebral blood volume in human infants by near-infrared spectroscopy
J. S. Wyatt, M. Cope, D. T. Delpy, C. E. Richardson, A. D. Edwards, S. Wray, and E. O. R. Reynolds 1086

Inspiratory and expiratory muscle function during continuous positive airway pressure in dogs
J. D. Road and A. M. Leevers 1092

Measurement of intracellular pH in hamster diaphragm by absorption spectrophotometry
R. Zhang, S. G. Kelsen, and J. C. LaManna 1101

Dynamics of the ventilatory response to central hypoxia in cats
D. S. Ward, A. Berkenbosch, J. DeGoede, and C. N. Olievier 1107

Calcium chelators induce bronchoconstriction in the canine lung periphery
K. S. Lindeman, C. A. Hirshman, and A. N. Freed 1114

Effects of continuous positive airway pressure breathing on lung volume and distensibility
C. J. Duggan, W. D. Castle, and N. Berend 1121

Influence of tidal volume on respiratory compliance in anesthetized infants and young children
M. E. Fletcher, M. Ewert, C. Stack, D. J. Hatch, and J. Stocks 1127

Antenatal betamethasone dose effects in preterm rabbits studied at 27 days gestation
E. D. Rider, A. H. Jobe, M. Ikegami, T. Yamada, and S. Seidner 1134

Effect of aminophylline on mechanical activity of rat diaphragm bundles
O. Delbono and B. A. Kotsias 1142

Gradual increase in leg oxygen uptake during repeated submaximal contractions in humans
N. K. Vøllestad, J. Wesche, and O. M. Sejersted 1150

Fluorescence location of RVLM kainate microinjections that alter the control of breathing
E. E. Nattie and A. Li 1157

Operation Everest II: neuromuscular performance under conditions of extreme simulated altitude
S. H. Garner, J. R. Sutton, R. L. Burse, A. J. McComas, A. Cymerman, and C. S. Houston 1167

Effect of maternal weight gain during pregnancy on exercise performance
M. W. Carpenter, S. P. Sady, M. A. Sady, B. Haydon, D. R. Coustan, and P. D. Thompson 1173

Electromyogram power spectra frequencies associated with motor unit recruitment strategies
M. Solomonow, C. Baten, J. Smit, R. Baratta, H. Hermens, R. D'Ambrosia, and H. Shoji 1177

Unchanged in vivo P_{50} at high altitude despite decreased erythrocyte age and elevated 2,3-diphosphoglycerate
H. Mairbäurl, W. Schobersberger, O. Oelz, P. Bärtsch, K. U. Eckardt, and C. Bauer 1186

Effect of mechanical loading on expiratory and inspiratory muscle activity during NREM sleep
M. S. Badr, J. B. Skatrud, J. A. Dempsey, and R. L. Begle 1195

Stimulation of rapidly adapting receptors in canine lungs by a single breath of cigarette smoke
Y. R. Kou and L.-Y. Lee 1203

Tracheal insufflation of tumor necrosis factor protects rats against oxygen toxicity
M.-F. Tsan, J. E. White, T. A. Santana, and C. Y. Lee 1211

Circulatory responses to vasoconstrictor agents during passive heating in the rat
K. C. Kregel and C. V. Gisolfi 1220

Inspiratory flow rate and dead space in dogs
G. G. Berdine, J. E. Johnson, D. Dale, and J. L. Lehr 1228

Concentration of aerosolized ^{99m}Tc-albumin in the pulmonary lymph of anesthetized sheep
B. T. Peterson and K. D. Dickerson 1233

Rat skeletal muscle mitochondrial [Ca^{2+}] and injury from downhill walking
C. Duan, M. D. Delp, D. A. Hayes, P. D. Delp, and R. B. Armstrong 1241

Antioxidants and antioxidant enzymes protect against pulmonary oxygen toxicity in the rabbit
J. M. Jacobson, J. R. Michael, M. H. Jafri, Jr., and G. H. Gurtner 1252

Leukotriene B_4 increases pulmonary transvascular filtration by a neutrophil-independent mechanism
C. A. Burgess, B. K. McCandless, J. A. Cooper, and A. B. Malik 1260

SPECIAL COMMUNICATIONS

Pleural pressure changes in dogs measured from suprasternal fossa movements
M. A. Sackner, S. Grenvik, N. E. Moavero, A. Belsito, G. Chapman, L. Yerger, and B. P. Krieger 1265

Convective heat transfer measured directly with a heat flux sensor

No. 4. APRIL 1990

BRIEF REVIEW

Neurogenesis, control, and functional significance of gasping
W. M. St. John 1305

Increased in vitro responses of tracheal smooth muscle from hyperresponsive guinea pigs
K. Ishida, P. D. Paré, R. J. Thomson, and R. R. Schellenberg 1316

Increased leukotriene E_4 excretion during antigen-induced bronchoconstriction in allergic sheep
P. Tagari, W. M. Abraham, J. McGolrick, S. Charleson, M. Soler, A. Ahmed, A. Cortez, and A. W. Ford-Hutchinson 1321

Distribution of pulmonary vascular resistance during lactic acid infusion in dogs
K. W. Presberg, J. I. Sznajder, J. Melendres, T. Lewis, C. Abrahams, and L. D. H. Wood 1328

Thermal adjustments to nonexertional heat stress in mature and senescent Fischer 344 rats
K. C. Kregel, C. M. Tipton, and D. R. Seals 1337

Expiratory abdominal muscle activity during ventilatory chemostimulation in piglets
J. F. Watchko, T. L. O'Day, B. S. Brozanski, and R. D. Guthrie 1343

Orocecal transit during mild exercise in women
W. F. Keeling, A. Harris, and B. J. Martin 1350

Silica directly increases permeability of alveolar epithelial cells
R. K. Merchant, M. W. Peterson, and G. W. Hunninghake 1354

Role of leukotrienes during oleic acid-induced lung injury in pigs
K. Kruse-Elliott and N. C. Olson 1360

Bubble-induced dysfunction in acute spinal cord decompression sickness
T. J. R. Francis, J. L. Griffin, L. D. Homer, G. H. Pezeshkpour, A. J. Dutka, and E. T. Flynn 1368

Effect of naloxone on spectral shifts of the diaphragm EMG during inspiratory loading
J. J. Petrozzino, A. T. Scardella, J. K.-J. Li, N. Krawciw, N. H. Edelman, and T. V. Santiago 1376

Prone position reverses gravitational distribution of perfusion in dog lungs with oleic acid-induced injury
C. M. Wiener, W. Kirk, and R. K. Albert 1386

Exercise and recovery ventilatory and $\dot{V}O_2$ responses of patients with McArdle's disease
J. M. Hagberg, D. S. King, M. A. Rogers, S. J. Montain, S. M. Jilka, W. M. Kohrt, and S. L. Heller 1393

Changes in the metabolic profile of equine muscle from birth through 1 yr of age
K. H. Kline and P. J. Bechtel 1399

Increases in coronary vein CO_2 during cardiac resuscitation
C. V. Gudipati, M. H. Weil, R. J. Gazmuri, H. G. Deshmukh, J. Bisera, and E. C. Rackow 1405

Total and local impedances of the chest wall up to 10 Hz
G. M. Barnas, K. Yoshino, J. Fredberg, Y. Kikuchi, S. H. Loring, and J. Mead 1409

Intravenous injection of propylene glycol causes pulmonary hypertension in sheep
D. A. Quinn, D. Robinson, and C. A. Hales 1415

Mucociliary interaction in vitro: effects of physiological and inflammatory stimuli
Z. V. Seybold, A. T. Mariassy, D. Stroh, C. S. Kim, H. Gazeroglu, and A. Wanner 1421

Determining deposition sites of inhaled lung particles and their effect on clearance
E. G. Langenback, E. H. Bergofsky, J. G. Halpern, and W. M. Foster 1427

Effect of dorsolateral pontine lesions on diaphragmatic activity during REMS
J. C. Hendricks, L. R. Kline, R. O. Davies, and A. I. Pack 1435

Assessment of rebreathing O_2 consumption in humans with normal and diseased lungs
M. C. Kallay, R. W. Hyde, and R. J. Smith 1443

Blood flow to contracting human muscles: influence of increased sympathetic activity
M. J. Joyner, R. L. Lennon, D. J. Wedel, S. H. Rose, and J. T. Shepherd 1453

Head-down bed rest impairs vagal baroreflex responses and provokes orthostatic hypotension
V. A. Convertino, D. F. Doerr, D. L. Eckberg, J. M. Fritsch, and J. Vernikos-Danellis 1458

Cardiovascular and respiratory responses to slow ramp carotid sinus pressures in the dog
R. Jung and P. G. Katona 1465

Adjustments in oxygen transport during head-out immersion in water at different temperatures
M.-L. Choukroun and P. Varene 1475

Biochemical transformation of canine skeletal muscle for use in cardiac-assist devices
C. D. Ianuzzo, N. Hamilton, P. J. O'Brien, C. Desrosiers, and R. Chiu 1481

Effect of diaphragmatic contraction on intramuscular pressure and vascular impedance
G. S. Supinski, A. F. DiMarco, and M. D. Altose 1486

Effect of hyperoxemia and ritanserin on skeletal muscle microflow
P. Thorborg, U. Gustafsson, F. Sjöberg, D. K. Harrison, and D. H. Lewis 1494

Distensibility and pressure-flow relationship of the pulmonary circulation
I. Single-vessel model
Z. Bshouty and M. Younes 1501

Distensibility and pressure-flow relationship of the pulmonary circulation
II. Multibranched model
Z. Bshouty and M. Younes 1514

Inflation of antishock trousers increases bronchial response to methacholine in healthy subjects
J. Regnard, P. Baudrillard, B. Salah, A. T. D. Xuan, L. Cabanes, and A. Lockhart 1528

Influence of adenosine on cerebral blood flow during hypoxic hypoxia in the newborn piglet
N. Laudignon, E. Farri, K. Beharry, J. Rex, and J. V. Aranda 1534

An antifibrotic agent reduces blood pressure in established pulmonary hypertension in the rat
G. J. Poiani, C. A. Tozzi, J. K. Choe, S. E. Yohn, and D. J. Riley 1542

Actin and creatine kinase mRNAs in rat levator ani and vastus muscles as a function of androgen status
G. Boissonneault, P. Chapdelaine, and R. R. Tremblay 1548

Tracheal smooth muscle responses to upper airway pressure in conscious dogs
L. Plowman, P. H. Edwards, D. C. Lauff, M. Berthon-Jones, and C. E. Sullivan 1555

Differential responses of the airways and pulmonary tissues to inhaled histamine in young dogs
P. D. Sly and C. J. Lanteri 1562

Effects of changes in osmolarity on isolated human airways
R. C. Jongejan, J. C. de Jongste, R. C. Raatgeep, I. L. Bonta, and K. F. Kerrebijn 1568

Leukotriene B_4 and late asthmatic reactions induced by toluene diisocyanate
E. Zocca, L. M. Fabbri, P. Boschetto, M. Plebani, M. Masiero, G. F. Milani, F. Pivirotto, and C. E. Mapp 1576

Derecruitment of filtration surface area in paraquat-injured isolated dog lungs
T. Shibamoto, J. C. Parker, A. E. Taylor, and M. I. Townsley 1581

Surfactant treatments alter endogenous surfactant metabolism in rabbit lungs
S. B. Oetomo, J. Lewis, M. Ikegami, and A. H. Jobe 1590

Effects of various concentrations of O_2 and umbilical cord occlusion on fetal breathing and behavior
R. J. Baier, S. U. Hasan, D. B. Cates, D. Hooper, B. Nowaczyk, and H. Rigatto 1597

Respiratory cross-sectional area-flux measurements of the human chest wall
R. Sartene, P. Martinot-Lagarde, M. Mathieu, A. Vincent, M. Goldman, and G. Durand 1605

Glucocorticoid receptor activation during exercise in muscle
S. M. Czerwinski and R. C. Hickson 1615

Information content of the multibreath nitrogen washout: effects of experimental error
K. S. Kapitan 1621

Role of leukotriene C_4 in pulmonary hypertension: platelet-activating factor vs. hypoxia
D. Davidson, M. Singh, and G. F. Wallace 1628

Influence of tidal volume on histamine-induced bronchoconstriction in guinea pigs
M. Benichou, A. M. Lorino, H. Lorino, I. Macquin-Mavier, N. Istin, and A. Harf 1634

Influence of the pericardium on ventricular loading during respiration
M. Takata, W. Mitzner, and J. L. Robotham 1640

Interpretation of interrupter resistance after histamine-induced constriction in the dog
M. S. Ludwig, P. V. Romero, P. D. Sly, J. J. Fredberg, and J. H. T. Bates 1651

Inference of motor unit recruitment order in voluntary and electrically elicited contractions
M. Knaflitz, R. Merletti, and C. J. DeLuca 1657

Corticosteroids increase lipocortin I in BAL fluid from normal individuals and patients with lung disease
M. P. Ambrose and G. W. Hunninghake 1668

Protection effect of endurance training against reoxygenation-induced injuries in rat heart
M. Kihlström 1672

Capsaicin-induced bronchoconstriction and neuropeptide release in guinea pig perfused lungs
F. Kröll, J.-A. Karlsson, J. M. Lundberg, and C. G. A. Persson 1679

Pathogenesis of pulmonary edema associated with intracisternal endotoxin in dogs
A. Nahum, L. D. H. Wood, G. Crawford, R. Ripper, L. Segil, and J. I. Sznajder 1688

MODELING METHODOLOGY FORUM

Evaluating pulmonary vascular permeability with radiolabeled proteins: an error analysis
M. A. Mintun, T. E. Warfel, and D. P. Schuster 1696

Right ventricular function and three-dimensional modeling using computer-aided design
F. G. Spinale, B. A. Carabello, and F. A. Crawford, Jr. 1707

SPECIAL COMMUNICATIONS

Small-sample reproducibility estimates: an example using rebreathing measurements
R. L. Jensen, R. O. Crapo, J. D. Mason, and F. G. Yanowitz 1717

Lung and chest wall mechanics in rabbits during high-frequency body-surface oscillation
D. A. Chartrand, J. M. Maarek, T. H. Ye, and H. K. Chang 1722

A comparison of indirect methods for continuous estimation of arterial P_{CO_2} in men
P. A. Robbins, J. Conway, D. A. Cunningham, S. Khamnei, and D. J. Paterson 1727

Inductance plethysmograph measurement of CPAP-induced changes in end-expiratory lung volume
J. L. Werchowski, M. H. Sanders, J. P. Costantino, F. C. Sciurba, and R. M. Rogers 1732

Intramuscular and esophageal electrode recordings of posterior cricoarytenoid activity in normal subjects
S. T. Kuna, J. S. Smickley, G. Insalaco, and G. E. Woodson 1739

Posterior cricoarytenoid muscle activity during wakefulness and sleep in normal adults
S. T. Kuna, J. S. Smickley, and G. Insalaco 1746

RAPID COMMUNICATIONS

Xanthine oxidase is increased and contributes to paraquat-induced acute lung injury
M. L. Waintrub, L. S. Terada, C. J. Beehler, B. O. Anderson, J. A. Leff, and J. E. Repine 1755

Amiloride impairs lung water clearance in newborn guinea pigs
H. O'Brodovich, V. Hannam, M. Seear, and J. B. M. Mullen 1758

LETTERS TO THE EDITOR

Errors in sheep carboxyhemoglobin measurements
K. G. Torrington and J. S. McNeil; M. A. Bureau 1763

ANNOUNCEMENTS

1776

No. 5. MAY 1990

BRIEF REVIEW

Muscarinic receptors in airways: recent developments
P. J. Barnes 1777

Effect of feeding regimen on diurnal variation of breathing movements in late-gestation fetal sheep
J. Callea, I. C. McMillen, and D. W. Walker 1786

Central vasopressin V_1-blockade prevents salicylate but not acetaminophen antipyresis
M. F. Wilkinson and N. W. Kasting 1793

Arachidonic acid causes cyclooxygenase-dependent and -independent pulmonary vasodilation
C. O. Feddersen, S. Chang, J. Czartalomna, and N. F. Voelkel 1799

Exercise tolerance and pulmonary gas exchange after deep saturation dives
E. Thorsen, J. Hjelle, K. Segadal, and A. Gulsvik 1809

Role of the glucose cycle in control of net glucose flux in exercising humans
J.-M. Weber, S. Klein, and R. R. Wolfe 1815

Effects of hypercarbia on arterial and alveolar oxygen tensions in a model of Gram-negative pneumonia
R. J. Keenan, T. R. J. Todd, W. Demajo, and A. S. Slutsky 1820

Resorptive clearance and transepithelial potential difference in capsaicin-treated F344 rats
G. T. De Sanctis, E. M. App, J. K. Trask, B. I. De Sanctis, J. E. Remmers, F. H. Y. Green, S. F. P. Man, and M. King 1826

Effect of 10 days of physical inactivity on glucose tolerance in master athletes
M. A. Rogers, D. S. King, J. M. Hagberg, A. A. Ehsani, and J. O. Holloszy 1833

Micropuncture pressure in small arteries or veins of perfused rabbit lungs
M. Onizuka, L. Wagner, G. Nicolaysen, and N. C. Staub 1838

Cobalt stimulates carotid body chemoreceptors
C. Di Giulio, W.-X. Huang, S. Lahiri, A. Mokashi, and D. G. Buerk 1844

Abdominal pressure transmission in humans during slow breathing maneuvers
J. Mead, K. Yoshino, Y. Kikuchi, G. M. Barnas, and S. H. Loring 1850

O_2 transfer kinetics in a whole blood unicellular thin layer
E. Heidelberger and R. B. Reeves 1854

Factors affecting whole blood O_2 transfer kinetics: implications for $\theta(O_2)$
E. Heidelberger and R. B. Reeves 1865

Significance of airway resistance for the pattern of breathing and lung volumes in exercising humans
C. M. Hesser, F. Lind, and D. Linnarsson 1875

Glycogen content has no effect on skeletal muscle glycogenolysis during short-term tetanic stimulation
L. L. Spriet, L. Berardinucci, D. R. Marsh, C. B. Campbell, and T. E. Graham 1883

Influence of caffeine on metabolic responses of men at rest in 28 and 5°C
K. W. MacNaughton, P. Sathasivam, A. L. Vallerand, and T. E. Graham 1889

Histochemical and enzymatic characteristics of skeletal muscle in master athletes
A. R. Coggan, R. J. Spina, M. A. Rogers, D. S. King, M. Brown, P. M. Nemeth, and J. O. Holloszy 1896

Age and hypohydration independently influence the peripheral vascular response to heat stress
W. L. Kenney, C. G. Tankersley, D. L. Newswanger, D. E. Hyde, S. M. Puhl, and N. L. Turner 1902

Effects of estrogen and progesterone on carotid body neural output responsiveness to hypoxia
B. Hannhart, C. K. Pickett, and L. G. Moore 1909

Changes in diaphragm motor unit EMG during fatigue
G. C. Sieck and M. Fournier 1917

Mechanisms of pulsus paradoxus in airway obstruction
A. R. Viola, R. J. M. Puy, and E. Goldman 1927

Determinants of restrictive lung function in asbestos-induced pleural fibrosis
D. A. Schwartz, J. R. Galvin, C. S. Dayton, W. Stanford, J. A. Merchant, and G. W. Hunninghake 1932

Effect of acute nutritional deprivation on diaphragm structure and function
M. I. Lewis and G. C. Sieck 1938

Reversible impairment of forearm vasodilation after forearm casting
D. H. Silber and L. I. Sinoway 1945

Effects of endurance exercise on isomyosin patterns in fast- and slow-twitch skeletal muscles
D. P. Fitzsimons, G. M. Diffee, R. E. Herrick, and K. M. Baldwin 1950

Leukocyte and platelet margination within microvasculature of rabbit lungs
C. M. Doerschuk, G. P. Downey, D. E. Doherty, D. English, R. P. Gie, M. Ohgami, G. S. Worthen, P. M. Henson, and J. C. Hogg 1956

Role of sulfidopeptide leukotrienes in synthetic smoke inhalation injury in sheep
D. A. Quinn, D. Robinson, W. Jung, and C. A. Hales 1962

Shape of the chest wall in the prone and supine anesthetized dog
S. S. Margulies and J. R. Rodarte 1970

Deformation of the dog lung in the chest wall
S. Liu, S. S. Margulies, and T. A. Wilson 1979

Relationship between thyroarytenoid activity and laryngeal resistance
A. Tully, A. Brancatisano, S. H. Loring, and L. A. Engel 1988

Rapidly adapting receptors monitor lung compliance in spontaneously breathing dogs
T. E. Pisarri, A. Jonzon, J. C. G. Coleridge, and H. M. Coleridge 1997

Insensitivity of maximum expiratory flow to bronchodilation in normal dogs
J. Eng, A. Gomez, and S. Mink 2006

Effects of cardiac oscillations and lung volume on acinar gas mixing during apnea
C. F. Mackenzie, M. Skacel, G. M. Barnas, W. J. Brampton, and C. A. Alana 2013

Contraction-dependent modulations in regional diaphragmatic blood flow
F. Hu, A. Comtois, and A. E. Grassino 2019

Effects of corticosteroids on postnatal lung and airway growth in the ferret
B. Ellington, J. T. McBride, and D. C. Stokes 2029

Influence of sleep on lung volume in asthmatic patients and normal subjects
R. D. Ballard, C. G. Irvin, R. J. Martin, J. Pak, R. Pandey, and D. P. White 2034

Effects of thromboxane on respiration and pulmonary circulation in the cat: role of vagus nerve
H. Shams and P. Scheid 2042

Skeletal muscle Po_2 during hypoxemia and isovolemic anemia
G. Gutierrez, C. Marini, A. L. Acero, and N. Lund 2047

Dibutyryl cAMP induces a gestation-dependent absorption of fetal lung liquid
D. V. Walters, C. A. Ramsden, and R. E. Olver 2054

^{31}P nuclear magnetic resonance spectroscopy study of the anaerobic threshold in humans
D. M. Systrom, D. J. Kanarek, S. J. Kohler, and H. Kazemi 2060

Glucoregulation and hormonal responses to maximal exercise in non-insulin-dependent diabetes
M. Kjær, C. B. Hollenbeck, B. Frey-Hewitt, H. Galbo, W. Haskell, and G. M. Reaven 2067

Chest wall motion and expiratory muscle use during phonation in normal humans
M. Estenne, L. Zocchi, M. Ward, and P. T. Macklem 2075

Cyclic ovarian function in recreational athletes
A. Broocks, K. M. Pirke, U. Schweiger, R. J. Tuschl, R. G. Laessle, T. Strowitzki, E. Hörl, T. Hörl, W. Haas, and D. Jeschke 2083

Chest wall motion of infants during spinal anesthesia
R. C. Pascucci, M. B. Hershenson, N. F. Sethna, S. H. Loring, and A. R. Stark 2087

Adrenergic and cholinergic interaction in central ventilatory control
M. D. Burton, D. C. Johnson, and H. Kazemi 2092

Sensation of dyspnea during hypercapnia, exercise, and voluntary hyperventilation
T. Chonan, M. B. Mulholland, J. Leitner, M. D. Altose, and N. S. Cherniack 2100

Effect of *N*-acetylcysteine on diaphragm fatigue
C. Shindoh, A. DiMarco, A. Thomas, P. Manubay, and G. Supinski 2107

Endurance-training-induced cellular adaptations in respiratory muscles
S. K. Powers, J. Lawler, D. Criswell, S. Dodd, S. Grinton, G. Bagby, and H. Silverman 2114

Po_2 modulation of paraquat-induced microvascular injury in isolated dog lungs
T. Shibamoto, A. E. Taylor, and J. C. Parker 2119

Effects of tidal volume and methacholine on low-frequency total respiratory impedance in dogs
K. R. Lutchen and A. C. Jackson 2128

Respiratory impedance and multibreath N_2 washout in healthy, asthmatic, and cystic fibrosis subjects
K. R. Lutchen, R. H. Habib, H. L. Dorkin, and M. A. Wall 2139

Responses of single phrenic motoneurons to altered ventilatory drives in anesthetized dogs
B. P. Lee, J. Green, and S. T. Chiang 2150

Influence of passive changes of lung volume on upper airways
F. Sériès, Y. Cormier, and M. Desmeules 2159

Selective permeability changes in the lungs and airways of sheep after toxic smoke inhalation
R. E. Barrow, S. E. Morris, J. O. Basadre, and D. N. Herndon 2165

Effect of vascular volume and edema on wave propagation in canine lungs
M. Jahed, S. J. Lai-Fook, and P. K. Bhagat 2171

Diaphragmatic perfusion heterogeneity during exercise with inspiratory resistive breathing
M. Manohar 2177

Tracheobronchial perfusion during exercise in ponies
M. Manohar 2182

Pulmonary afferent control of breathing as end-expiratory lung volume decreases
J. F. Green and M. P. Kaufman 2186

Decline in $\dot{V}O_{2\,max}$ with aging in master athletes and sedentary men
M. A. Rogers, J. M. Hagberg, W. H. Martin III, A. A. Ehsani, and J. O. Holloszy 2195

Videofluoroscopic assessment of muscle fiber shortening in the in situ canine diaphragm
H. Knight, W. M. Petroll, J. M. Adams, H. A. Shaffer, and D. F. Rochester 2200

Intrapericardial denervation: radial artery blood flow and heart rate responses to LBNP
K. H. McKeever, M. G. Skidmore, L. C. Keil, and H. Sandler 2208

Leukotrienes and prostaglandins in fetal lung liquid
S. Cassin, K. R. Stenmark, G. Gause, L. M. Zapp, H. Kuck, and J. Y. Westcott 2214

Mechanical modulation of pressure-volume characteristics of contracted canine airways in vitro
S. J. Gunst, J. Q. Stropp, and J. Service 2223

Quasi-static pressure-volume hysteresis in the canine respiratory system in vivo
F. R. Shardonofsky, J. Sato, and J. H. T. Bates 2230

RAPID COMMUNICATIONS

Fiber subtype distribution of pharyngeal dilator muscles and diaphragm in the cat

J. Yanos, A. Banner, R. Stanko, S. Gentry, and K. Greenawalt 2511

Evidence that the metabolic acidosis threshold is the anaerobic threshold
A. Koike, D. Weiler-Ravell, D. K. McKenzie, S. Zanconato, and K. Wasserman 2521

Oxidative phosphorylation system during steady-state hypoxia in the dog brain
S. Nioka, D. S. Smith, B. Chance, H. V. Subramanian, S. Butler, and M. Katzenberg 2527

Breathing and lung mechanics in hamsters: effect of pentobarbital anesthesia
W. A. Skornik and J. D. Brain 2536

Tumor necrosis factor's effects on lung mechanics, gas exchange, and airway reactivity in sheep
A. P. Wheeler, G. Jesmok, and K. L. Brigham 2542

Simulation of the effects of mechanical nonhomogeneities on expiratory flow from human lungs
R. K. Lambert 2550

Waking and genioglossus muscle responses to upper airway pressure oscillation in sleeping dogs
L. Plowman, D. C. Lauff, M. Berthon-Jones, and C. E. Sullivan 2564

Stimulation of tracheal ciliary beat frequency by capsaicin
L. B. Wong, I. F. Miller, and D. B. Yeates 2574

Selective reflex activation of the genioglossus in humans
J. C. Leiter and J. A. Daubenspeck 2581

Ethane production rate in vivo is reduced with dietary restriction
M. P. Habib, F. Dickerson, and A. D. Mooradian 2588

Aminophylline and human diaphragm strength in vivo
R. D. Levy, S. Nava, L. Gibbons, and F. Bellemare 2591

Cyclooxygenase inhibitors increase canine tracheal muscle response to parasympathetic stimuli in situ
R. A. Bethel and C. L. McClure 2597

Ventilatory control during exercise in calves with artificial hearts
A. Huszczuk, B. J. Whipp, T. D. Adams, A. G. Fisher, R. O. Crapo, C. G. Elliott, K. Wasserman, and D. B. Olsen 2604

Exercise training attenuates diet-induced reduction in metabolic rate
D. L. Ballor, L. J. Tommerup, D. P. Thomas, D. B. Smith, and R. E. Keesey 2612

Effects of cold and capsaicin desensitization on prostaglandin E hypothermia in rats
S. G. Shimada, J. T. Stitt, and P. Angelogianni 2618

Clearance of lung edema into the pleural space of volume-loaded anesthetized sheep
V. C. Broaddus, J. P. Wiener-Kronish, and N. C. Staub 2623

Substance P in the ventrolateral medulla oblongata regulates ventilatory responses
Z. Chen, J. Hedner, and T. Hedner 2631

SPECIAL COMMUNICATIONS

Measurement of peptidoleukotrienes in biological fluids
J. Y. Westcott, K. Johnston, R. A. Batt, S. E. Wenzel, and N. F. Voelkel 2640

Hypopharyngeal and neck cross-sectional changes monitored by inductive plethysmography
G. Liistro, D. Stănescu, G. Dooms, C. Veriter, G. Aubert-Tulkens, and D. Rodenstein 2649
